WORK EXPERIENCE

Software Engineer II – [Doxy.me](#)

Aug 2023 – Feb 2025

Frontend Developer in charge of Telehealth extensions on the Clinic team with a focus on animations

- Built an interpreter application that connects a translator to live video calls using **Typescript & React**
- Developed a real-time, shared PDF-form-filler application for doctors and their patients over live video calls using **Typescript & React**
- Combined **Rive** and **SCSS** animations to improve chatbot user experience using **Vue.js**
- Implemented animations for the marketing [site](#) using **GSAP, Typescript, React, & Prismic**

Frontend Software Engineer – [Hook](#)

May 2022 – December 2022

Creative frontend developer for an ad agency and digital production company

- Created fun animations on the Hook [website](#) using **Typescript, React, Next.js, Sanity**, and **GSAP**
- Implemented Google's version of an Instagram story ad using their custom tech stack (Amp, Kintaro, Bracket)

Frontend Software Engineer – [Ghostery](#)

Sept 2019 – April 2021

Frontend developer in a startup creating privacy tools including browser and system level ad-blockers

- Built animated graphs and themes for an open-source ad-blocking [browser extension](#) using **React, SCSS, D3.js, Jest**
- Developed the UI for tracking real-time network requests in the ad-blocking **electron app**

Software Engineer – [DWM Comprehensive Facility Solutions](#)

Feb 2018 – June 2019

Technical lead for all software projects company-wide regarding architectural design, development timeline, and system failure

- Maintained 5 **web applications** using **React, SCSS, C# .NET, ASP.NET MVC, SQL Server**, & **IIS** that helped the company source work, record transactions and automate tasks
- Designed and developed a **React Native** Mobile App – [\[Hera OnSite\]](#)

EDUCATION

Stony Brook University

B.S. in Computer Science

September 2012 – May 2016
